About IDIS

IDIS is a global leader in advanced surveillance solutions, renowned for delivering high-quality, user-friendly security technology across diverse industries. As South Korea's largest video surveillance manufacturer, IDIS operates in over 50 countries and collaborates with more than 100 strategic partners. With an emphasis on end-to-end solutions, IDIS provides cutting-edge video management systems, innovative AI-driven analytics and robust security infrastructure to organisations worldwide.

The Partnership with Secure Logiq

The collaboration between IDIS and Secure Logiq brings together two industry powerhouses to redefine performance, efficiency and reliability in large-scale video surveillance. By integrating IDIS's high-performance surveillance technology with Secure Logiq's specialised server solutions, organisations can now achieve unparalleled system optimisation, enhanced storage capabilities and cost-efficient scalability.

This partnership is particularly impactful for mission-critical applications in sectors such as oil and gas, banking, and critical infrastructure—especially in the Middle East, where large-scale projects require extended video retention and seamless hybrid cloud solutions.

Key Benefits

Unrivalled Performance – Secure Logiq's high-powered servers optimise IDIS's feature-rich VMS, ensuring ultra-fast processing and smooth real-time video streaming.

Enhanced Storage Efficiency – Organisations can reduce hardware stacks by up to 40%, significantly cutting costs while maintaining long-term video retention capabilities.

Superior Reliability – Secure Logiq's resilient hardware, paired with IDIS's intelligent video solutions, guarantees a robust and stable surveillance infrastructure.

Hybrid Storage Solutions – The partnership meets the growing demand for hybrid surveillance, allowing critical footage to be stored in the cloud while maintaining on-premises video archives.

Future-Proof Technology – By combining IDIS's scalable VMS with Secure Logiq's advanced server technology, enterprises benefit from a sustainable, long-term surveillance strategy.

Industry Impact

Large-scale surveillance users—particularly those with demanding 90+ day storage requirements—will benefit from this strategic collaboration. By optimising video management and storage, IDIS and Secure Logiq empower organisations to enhance security, streamline operations and maximise return on investment.

With increasing reliance on high-definition video analytics and AI-driven surveillance, this partnership ensures that businesses in the Middle East and beyond can deploy high-performance solutions without compromising efficiency or budget.

What Our Leaders Say

“Many customers were buying servers from IT suppliers that simply weren't fit for purpose. We recommend Secure Logiq because we know they deliver reliable, high-performance solutions that support video surveillance applications seamlessly.”

Jamie Barnfield
Senior Sales Director, IDIS

“We have been delighted with the collaboration between our product management teams testing IDIS's feature-rich VMS on Secure Logiq's powerful H-series servers. The performance results have been outstanding, demonstrating the perfect combination for large-scale enterprise CCTV projects.”

Robin Hughes
Co-founder, Secure Logiq

“Both our companies have a strong presence in the Middle East and a track record of delivering customised surveillance solutions for demanding applications. This partnership strengthens our position in the region and brings meaningful cost and performance benefits to customers.”

Dennis Choi
General Manager, IDIS Middle East & Africa

Looking Ahead

Following on from their successful collaborations at industry-leading shows such as Intersec, Secure Logiq and IDIS will continue to expand their collaboration, new advancements in intelligent surveillance, storage efficiency and enterprise security - further solidifying their industry-leading status.
