About Ivideon

With over 12 years of experience, Ivideon has established itself as a leading provider of Cloud Video Surveillance and Video Analytics. Serving more than 5 million users across 120+ countries, Ivideon offers a seamless and scalable surveillance solution powered by advanced AI analytics. Its technology enables effortless integration via API and SDK, ensuring businesses can enhance security, optimise operations and gain valuable insights through comprehensive analytics and reporting tools.

The Partnership with Secure Logiq

This strategic partnership brings together the best of both worlds—Secure Logiq's high-performance surveillance hardware and Ivideon's cutting-edge cloud-based solutions. Together, they are redefining hybrid and on-premises video surveillance, offering enhanced security, reliability and intelligence to businesses worldwide.

Key Benefits

- **Premium-Optimised Servers** – Secure Logiq's purpose-built hardware ensures peak performance, resilience, and efficiency in video surveillance applications.
- **Seamless Hybrid Integration** – Ivideon Node enables a smooth transition between on-premises and cloud surveillance, supporting up to 300 cameras per server with high fault tolerance.
- **AI-Powered Analytics** – Ivideon Smart Bridge enhances surveillance with intelligent features, including Facial Recognition, ANPR, Fire & Smoke Detection, Visitor Counters, and Access Control.
- **Future-Ready Scalability** – Rapid and hassle-free upgrades allow existing CCTV setups to integrate with cloud solutions without requiring camera replacement.
- **Exceptional Customer Support** – Both companies are committed to delivering industry-leading service, ensuring reliability and efficiency for clients worldwide.

Industry Impact

The security landscape is evolving rapidly, with businesses demanding more intelligent, scalable and hybrid surveillance solutions. This partnership ensures customers receive the most advanced, cost-effective and resilient video security infrastructure available today.

What Our Leaders Say

“Partnering with Secure Logiq and leveraging their premium hardware allows us to introduce Ivideon Node, a pivotal step in our evolution as a cloud surveillance provider. By expanding into hybrid and on-premise solutions, we are meeting diverse client needs like never before.

Vic Saikovski
Sales and Business Development, Ivideon

“With a truly hybrid solution catering to diverse needs, we anticipate this partnership will deliver unmatched reliability, intelligence, and scalability to our clients. We're excited for the future with Secure Logiq.

Iliya Ilchishin
Head of International Sales, Ivideon

“We are thrilled to collaborate with Ivideon to enrich our video surveillance offerings. This partnership allows us to combine high-performance hardware with advanced cloud solutions, giving customers the best possible security infrastructure.

Hayley Joseph
Markets & Channel Manager, Secure Logiq

Looking Ahead

Ivideon and Secure Logiq are committed to driving innovation in video surveillance. As security threats grow more sophisticated, this partnership will continue to develop advanced, AI-driven solutions that empower businesses with smarter surveillance, better analytics, and stronger security.
