About Ocucon

Ocucon is a pioneering technology company specialising in AI-driven loss prevention, health & safety solutions and GDPR-compliant video redaction. Their flagship Pixelate tool is a cutting-edge video redaction solution, enabling businesses to automate GDPR compliance by efficiently redacting camera footage for Subject Access Requests (SARs).

In addition to video redaction, Ocucon provides advanced AI-powered safety solutions, including:

- **Liquid Spill Detection** – Real-time AI alerts to prevent slip-and-fall accidents

- **Hazard Detection & Monitoring** – Automated identification of blocked exits, obstructed aisles and other risks

- **AI-Driven Health & Safety Compliance** – Continuous monitoring to mitigate risk and liability

With a strong focus on technical innovation, Ocucon empowers loss prevention and health & safety professionals by providing automated, AI-driven insights that reduce risks, enhance compliance and improve operational efficiency.

The Power of Partnership

Ocucon and Secure Logiq have formed a strategic technology partnership to deliver fast, resilient and scalable AI-powered security solutions. Secure Logiq's industry-leading surveillance servers provide the high-speed processing and large-scale storage required to optimise Ocucon's AI-driven health & safety systems.

Partnership Highlights

- **Fastest Performance** – Optimised AI processing with low-latency frame capture

- **Biggest Storage** – High-capacity servers for storing and analysing vast amounts of CCTV footage

- **Most Resilience** – Secure, mission-critical infrastructure designed for 24/7 AI processing

By combining Ocucon's advanced AI analytics with Secure Logiq's ultra-fast servers, organisations can proactively prevent accidents, respond faster to compliance requests and enhance their overall security strategy.

Why This Partnership Matters

- **Optimised AI Processing** – Secure Logiq's high-performance servers ensure fast and accurate AI-driven hazard detection

- **Seamless GDPR Compliance** – Pixelate automates video redaction, making compliance easier than ever

- **Proactive Risk Mitigation** – AI-powered real-time monitoring helps businesses prevent accidents before they happen

- **Scalable & Future-Proof** – Designed to handle expanding surveillance networks and AI capabilities

What Our Leaders Say

"At Ocucon, our customers rely on our Health & Safety AI solutions to deliver critical insights and value. To achieve this, it's essential that we work with best-in-class technology partners like Secure Logiq, whose servers provide the robust performance needed to capture frames, generate alerts and fully leverage the power of our AI solutions.

Ian Graham
SVP Global Sales

Looking Ahead

Ocucon and Secure Logiq are committed to an ongoing partnership that continues to enhance the value we bring to clients. As AI-based health & safety solutions evolve, Secure Logiq's high-performance infrastructure will play an even greater role in delivering the speed, reliability and scalability required to meet growing market demands.

Together, Ocucon and Secure Logiq are driving the future of AI-powered security and compliance solutions, ensuring businesses can operate more safely, efficiently and with greater confidence.
