TECHNOLOGY PARTNERSHIP

Quanika

About Quanika

Quanika is a leading provider of advanced access control and security management solutions, offering flexible, scalable systems designed to meet the needs of organisations of all sizes. From small businesses to multi-site enterprise facilities, Quanika's solutions streamline security and visitor management, enhancing operational control, tailored to unique client requirements.

With deep integrations across 20+ industry-leading manufacturers - including HID, Mercury and Axis Communications - Quanika ensures seamless compatibility. By bridging access control with wider security and building management functions, Quanika empowers organisations to adapt, compete and operate securely in today's interconnected world.

The Partnership with Secure Logiq

Quanika's partnership with Secure Logiq unites cutting-edge security management technology with high-performance security servers, delivering failover-ready, scalable and future-proof security solutions. Secure Logiq's purpose-built hardware optimises Quanika's systems, ensuring efficient security management across diverse applications.

This collaboration benefits industries where security and reliability are paramount, from corporate offices and public institutions to critical infrastructure and high-security sites. By integrating Secure Logiq's powerful server technology, Quanika customers gain enhanced failover protection, improved video processing capabilities and seamless scalability - essential for modern, mission-critical environments.

Key Benefits

Optimised for Security – Purpose-built infrastructure ensures enhanced reliability and resilience for Quanika's access control and security management systems.
Failover & Redundancy – Secure Logiq's advanced failover support guarantees continuous system availability, preventing downtime.
Scalability & Flexibility – Whether managing a single site or a global enterprise, this partnership ensures security systems grow with your organisation.
Seamless Integration – Quanika's solutions work in harmony with Secure Logiq's hardware, providing a unified, high-performance security ecosystem.
Cost-Effective & Future-Proof – Businesses benefit from long-term savings with optimised infrastructure that evolves alongside technological advancements.

Industry Impact

As security demands increase, businesses require solutions that not only protect assets and personnel but also improve operational efficiency. With Secure Logiq's robust hardware supporting Quanika's feature-rich access control and visitor management solutions, organisations can reduce risk, enhance security resilience and ensure compliance across multiple locations.

This partnership empowers security and operations teams to monitor, manage and adapt their security infrastructure with confidence.

What Our Leaders Say

"By choosing Secure Logiq for Quanika's systems, you benefit from purpose-built hardware designed to enhance the performance and reliability of your security management operations. Secure Logiq's advanced failover support, seamless scalability and video processing capabilities mean your system is efficient and resilient. Together, Quanika and Secure Logiq provide robust, cost-effective and future-proof solutions designed to meet the needs of all sites.

Phil Campbell
Sales Director EU, Quanika

"Secure Logiq's purpose-built servers are ideal for our systems, offering unmatched reliability, scalability and efficiency. This collaboration delivers cost-effective, high-performance solutions that are built to grow with your needs.

Oliver Copland
Sales Executive, Quanika

Looking Ahead

As the need for intelligent, integrated security solutions continues to grow, Quanika and Secure Logiq are committed to driving innovation and delivering next-generation security management tools. This partnership will continue to evolve, ensuring customers benefit from cutting-edge technology that enhances security, reduces risk and streamlines operations across diverse sectors.
