About Vega Systems Inc.

Vega Systems Inc. is a leading provider of advanced software solutions designed to enhance data centre redundancy and optimise critical infrastructure security. With expertise in high-performance video security architectures, Vega Systems delivers innovative, resilient, and scalable solutions for mission-critical environments.

Deployed in high-stakes industries, Vega Systems' technology supports operations in:

Airports – Ensuring seamless surveillance and security monitoring

Campuses – Providing scalable and intelligent security solutions

Seaports – Strengthening perimeter defence and access control

Power Plants – Protecting vital energy infrastructure from threats

Military Installations – Delivering secure and robust defence-grade solutions

With a commitment to efficiency, security, and reliability, Vega Systems is a trusted industry leader, ensuring high-availability infrastructure for critical operations worldwide.

Partnership with Secure Logiq

Secure Logiq and Vega Systems have formed a powerful partnership, combining industry-leading expertise in surveillance-optimised hardware and critical infrastructure security software. This collaboration ensures that clients benefit from:

- **System Expertise** – Cutting-edge software meets purpose-built hardware
- **Great Team Dynamic** – A shared vision for innovation and customer success
- **Quality Servers** – Optimised, high-performance, and resilient solutions

By integrating Secure Logiq's advanced surveillance servers with Vega Systems' robust software solutions, customers gain unparalleled efficiency, reliability and performance in their security infrastructure.

Why Vega Systems & Secure Logiq?

This partnership enables security professionals to maximise uptime and minimise risk, delivering:

Ultra-Reliable Redundancy – Ensuring continuous operations even in failure scenarios

Scalability – Designed for large-scale deployments and expanding security needs

Performance-Optimised Solutions – High-speed processing and real-time analysis

Cybersecurity & Compliance – Meeting the highest industry standards for data protection

What Our Leaders Say

“We are highly impressed by the Secure Logiq team's extensive expertise and technical maturity, demonstrated by their numerous successful deployments. Their dynamic and energetic approach makes them an excellent partner!”

Thejaswi Bharadwaj

Founder, Vega Systems Inc.

“We are really excited to support Vega Systems and their redundancy and migration solutions offered to Milestone XProtect clients!”

Hayley Joseph

Markets & Channel Manager, Secure Logiq

Future of the Partnership

As the demand for high-performance security solutions continues to grow, Vega Systems and Secure Logiq are committed to pushing the boundaries of innovation. Together, they will continue to set new standards in video security, data centre redundancy and critical infrastructure protection.

By combining Secure Logiq's high-density surveillance servers with Vega Systems' cutting-edge redundancy and security software, this partnership ensures that customers receive the most resilient, secure and scalable solutions available today.
