

Cortech and Secure Logiq deliver industry leading solutions

Cortech Developments is proud to announce a strategic partnership with Secure Logiq, officially appointing them as our approved supplier of IT hardware. This collaboration unites two Great British Manufacturers with a shared vision—delivering world-class, high-performance solutions that set new industry standards.

As specialists in software integration for high-security environments, Cortech's solutions have long been trusted by organisations responsible for critical national infrastructure. Secure Logiq's expertise in ultra-high-performance surveillance servers complements our offering, ensuring that end users benefit from a fully optimised, resilient, and scalable security system.

A Partnership Built on Trust and Collaboration

At the heart of this partnership lies a commitment to delivering best-in-class security solutions to high security environments. Cortech and Secure Logiq are both dedicated to developing innovative, reliable, and future-proof technologies that meet the evolving needs of security-conscious industries.

John Hill, Head of Operations at Cortech, highlights the significance of this collaboration: "Both Cortech Developments and Secure Logiq are driven by a commitment to quality, innovation, and customer success. This partnership provides a platform for our market-leading software to operate seamlessly on Secure Logiq's industry-best HD surveillance hardware. The synergy between our two companies will undoubtedly deliver outstanding results for our customers, and that's something we're excited about!"

Hayley Joseph, Channels and Markets Manager at Secure Logiq, adds: “For me, working alongside the Cortech team to develop a technology partnership made sense from the beginning. We created the opportunity for two great British manufacturers joining forces to provide Enterprise level Management solutions executed on optimised hardware purpose-built for the application.

“As the customer-facing element of the full enterprise electronic security solution, it was imperative that together we deliver a smooth-running and reliable operator experience serving the industry’s most critical sites. I’m proud to have been a part of the collaboration.”

This partnership reassures end users that they are investing in a solution that has been rigorously tested and optimised for demanding security applications.

Delivering a Complete Solution for High-Security Sectors

Security is a mission-critical function for organisations operating in high-risk environments. By combining Cortech’s software with Secure Logiq’s high-performance surveillance hardware, we are enhancing security operations for industries where reliability is paramount.

The joint solution is ideally suited for:

- Critical National Infrastructure (CNI) – Power stations, water treatment facilities, and transportation networks that require robust and resilient security solutions to mitigate threats and ensure operational continuity.
- Government and Defence – Securing sensitive locations with high-performance surveillance solutions that deliver real-time monitoring and rapid incident response.
- Utilities and Energy – Helping organisations meet regulatory compliance and protect vital resources with advanced security monitoring.

- High-Security Commercial Sites – Large-scale, multi-site businesses that need centralised security management to protect assets and personnel.

Why This Matters for Our Customers

Security is not just about technology—it's about trust, performance, and reliability. By working together, Cortech and Secure Logiq provide a comprehensive solution that:

- Reduces system complexity through seamless integration of software and hardware.
- Enhances situational awareness by delivering real-time data and high-definition surveillance feeds.
- Improves system resilience with high-availability, high-performance servers designed for mission-critical security operations.
- Future-proofs security infrastructure with scalable solutions that grow with customer needs.

Jason Blundell, Head of Sales and Marketing for Cortech, adds: "Partnering with Secure Logiq allows us to offer our customers an advanced, fully integrated solution that enhances security and provides peace of mind. In high-security environments, reliability is everything, and this partnership ensures that our customers receive the best possible combination of software intelligence and hardware performance. We are excited to see how this collaboration develops and how it will shape the future of security solutions in our industry."

A Future-Proofed Approach to Security

As security threats become more sophisticated, organizations need solutions that not only meet today's challenges but also prepare them for the future. The partnership between Cortech and Secure Logiq represents a commitment to continuous innovation, ensuring that customers remain ahead of emerging risks and

technological advancements.

With Secure Logiq's ultra-high-performance servers specifically designed for HD surveillance and Cortech's proven expertise in security software integration, customers can be confident they are investing in a solution that is built to last.
