Cortech announces new approved supplier

Cortech Developments are delighted to officially announce that Secure Logiq have been appointed as our approved supplier of PC Hardware. This new technology partnerships allows us to offer a bespoke solution to our end users globally, that combines the benefits of our software solution with the benefits of high-performance servers that have been specifically designed for HD surveillance.

About Secure Logiq

Formed in 2011, Secure Logiq is the world's leading producer of ultra-high-performance HD surveillance servers and associated technology. With a research and development centre based in Croydon, UK, Secure Logiq also provides a unique range of professional services and custom solutions to the HD CCTV surveillance and security sector.

Secure Logiq's company ethos is based on four core principles – to provide the fastest performance, the biggest storage, the most resilience and the best value in HD processing and storage technology.

Manufactured in the UK, their range consists of the industry's highest throughput and highest storage density servers, award-winning Analytics Optimised Servers and VMS optimised client machines.

Their in-house technical experts combine over 40 years of IP CCTV and server experience, and the team boasts respected thought leaders from both the HD surveillance and IT hardware industries.

What and Why

We understand that partnering with other manufacturers increases value for our customers as they benefit from a more complete solution that mitigates risk and provides more added value. This partnership should give our mutual customers confidence that Secure Logiq hardware and Cortech software are a strong and compatible combination for their projects.

John Hill, Head of Operations for Cortech, comments "Both Cortech Developments and Secure Logiq are organisations that have customer, quality, and innovation at the core of their vision. This strategic supplier partnership creates the stage for our market leading software integration solutions to be showcased on their market leading, ultra-high-performance HD surveillance hardware. I'm confident our relationship with Secure Logiq will result in exceptional results for our customers and that excites me!"

Outcome

This partnership now means that Cortech Developments customers will now have access to a range of hardware products specifically designed and optimised to manage and display multiple streams of HD video data supplied by Secure Logiq. Jason Blundell, Head of Sales and Marketing for Cortech concludes, "Working with partners such as Secure Logiq enables us to offer our customers access to a solution that provides them with that extra layer of security and peace of mind. We are very much looking forward to seeing what the future holds for this partnership."
