## Technology Partnership: ISM

Founded in 1989, ISM is a global pioneer in the design and manufacture of intelligent, integrated security and building management information systems. With over 35 years of industry expertise, ISM specialise in advanced converged solutions including digitised custodial intercom and cell call systems. All their innovation is driven from our principal office and manufacturing facilities in the South of England.

As a fully independent, market-agnostic provider, ISM remains unaffiliated with any control equipment manufacturer. This enables them to deliver unbiased and flexible solutions tailored to each client's needs.

Their proprietary Genesys I-CMS platform is trusted by prestigious organisations across the UK and beyond, including central and local governments, critical infrastructure providers, law enforcement agencies, educational institutions and healthcare campuses. Offering solutions that strengthen security, ISM ensure compliance and deliver measurable ROI – all while simplifying complex decision-making processes for clients.

## Partnership with Secure Logiq

Secure Logiq and ISM share a long-standing relationship built on reliability, transparency and mutual technical expertise. Together, we deliver integrated, end-to-end solutions to clients operating in high-security environments.

Clients benefit from:

- Pre-Staged Hardware – ISM-approved hardware is delivered fully pre-staged with Genesys Software
- Turn-Key Communication – Excellent collaboration between ISM and Secure Logiq ensures seamless delivery of robust solutions
- Trusted Integration – Our combined approach guarantees scalable, flexible security infrastructure ready for complex deployments

## Why ISM & Secure Logiq?

This partnership enables clients to benefit from:

- Seamless integration of approved hardware and intelligent software
- Reliable deployment across various sectors, including custodial, civic and secure facilities
- Clear communication and joint support from two highly experienced teams

## What Our Leaders Say

Secure Logiq understands the market sectors and electronic security solutions landscape, providing reliable, approved hardware in various form factors, suitable for the intended applications.

### Phil Tennent

Business Development Manager, ISM UK

## Looking Ahead

As the security landscape continues to evolve, our partnership with ISM remains a cornerstone of delivering dependable, future-ready solutions. We're committed to deepening this collaboration, refining our joint offering, supporting the next generation of Genesys deployments. Together, we're well positioned to continue meeting the needs of clients operating in the UK's most secure and sensitive environments.
