About Network Optix

Network Optix (Nx) is a global leader in video software, enabling the creation of intelligent video solutions that transform video into actionable intelligence. With over a decade of innovation, Nx empowers organisations to build custom, enterprise-scale systems for operational efficiency and data-driven decision-making.

Their flagship product, Nx Witness, is trusted worldwide for its speed, flexibility, and ease of use. Network Optix is headquartered in Walnut Creek, California, with global offices in Burbank, Portland, Belgrade, Taipei, and beyond. They've been recognised in the Inc. 5000 Fastest Growing Companies list for nine consecutive years.

Their aim is to power the world's most intelligent video solutions, revolutionising how organisations visualise, navigate and understand their environments through real-time insight and high-performance video infrastructure.

Partnership with Secure Logiq

Secure Logiq and Network Optix combine purpose-built hardware and world-class software to deliver high-efficiency, mission-critical surveillance systems. Our shared values around performance, reliability and engineering precision create a powerful synergy for system integrators and end users alike.

Clients benefit from:

- Customised hardware builds tested and certified for Nx Witness
- Pre-sales, install, and post-sales support from both teams
- Scalable solutions suitable for SMBs through to complex infrastructure deployments

Why Network Optix & Secure Logiq?

- Purpose-built performance: Secure Logiq's servers are designed for high-resolution video workloads
- Deep technical expertise: Both teams work in harmony across hardware and VMS requirements
- Global reputation for quality: Trusted by security professionals for mission-critical projects

What Our Leaders Say

“ Working with Secure Logiq has been nothing short of exceptional. Their dedication to performance, reliability, and customer-first engineering perfectly complements the values we uphold at Network Optix. Together, we deliver scalable, high-efficiency video solutions that partners and end users can rely on.

George Matic
Regional Manager UK & Ireland, Network Optix

Looking Ahead

Secure Logiq proud to partner with Network Optix, whose intelligent video solutions transform visual data into real-time, actionable insights. By combining their powerful VMS software with our purpose-built surveillance servers — designed specifically for video, not repurposed IT hardware — we create high-performance, reliable systems that deliver total peace of mind in mission-critical environments.

Their software runs seamlessly on our security-optimised storage, enabling fast, smooth deployments and confident long-term operation. It's a partnership built on shared values: performance, precision, and people-first engineering.

As we continue working together, we're excited to bring even more integrators and end users into the fold, offering solutions that feel considered from day one and deliver lasting value.
